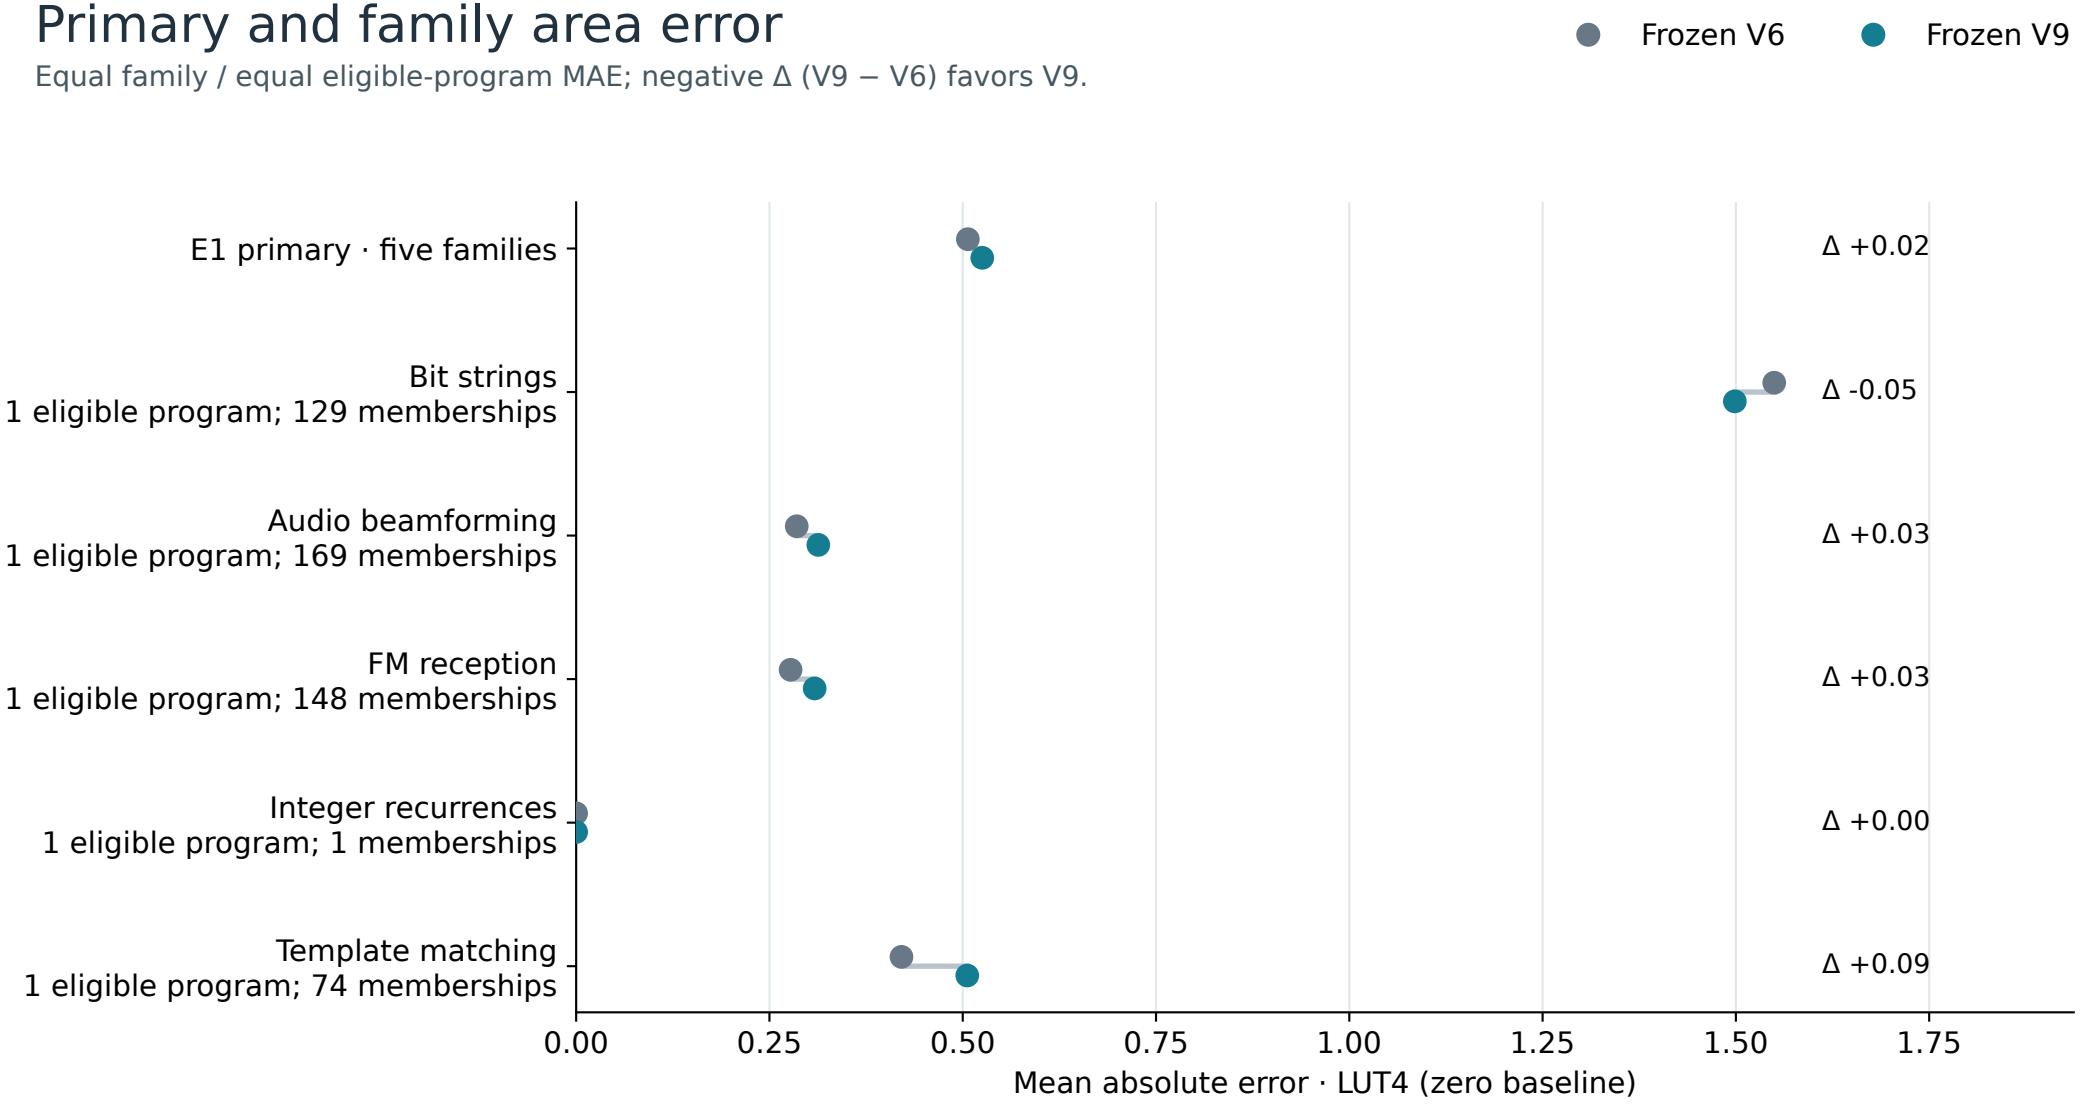
Primary and family area error

Equal family / equal eligible-program MAE; negative Δ (V9 − V6) favors V9.



327 unique physical targets; 521 memberships. Complete: ammunition, audiobeam, pm, fmref, fac; recursion empty (error unavailable).
Original equal-all-program endpoint remains undefined. E1 gives the eligible factorial program the recurrence-family weight.

Frozen V6/V9 · V11b-E1 · iCE40 original-RTL LUT4; descriptive, no CI or CPU timing claim.
